

Work Anywhere. Secure Everything!

Cover-All's IBM Cloud + CTERA Enterprise File Services

Work Anywhere. Secure Everything!

Cover-All has partnered with IBM for Cloud Object Storage (COS) and CTERA Enterprise File Systems to develop a storage solution enabling clients to access storage from a central repository residing in the Cloud, anywhere within the company, regardless of topology or geography. The solution is managed and supported by Cover-All's Managed Services team, which has the expertise and track record that clients have come to rely on.

Discover how Cover-All, IBM and CTERA can simplify your IT infrastructure, enhance collaboration, and protect your most valuable asset – your data.

Transform Your Data Infrastructure

Cover-All's IBM Cloud Object Storage + CTERA Enterprise File Services

In today's fast-paced digital world, your business needs a secure, flexible, and high-performing data solution. Cover-All Managed Cloud and IT Services, in partnership with IBM Cloud and CTERA, delivers a modern approach that combines enterprise-grade file services with the scalability of cloud object storage, enabling you to work from anywhere while securing everything.

CTERA's unified file services delivery system combines the benefits of local file services at the edge with multi-cloud storage flexibility and security. It also unifies endpoint, branch office, and Cloud file services to enable next-generation file storage, collaboration, data protection, and disaster recovery. Cover-All's IBM Cloud + CTERA Enterprise File Systems platform is a powerful blend of technology and managed services that empowers your team to work from anywhere while keeping your data secure and compliant.

Enterprise-Grade Security & Compliance

Protect your data and stay compliant with built-in, enterprise-level security features:

- ✓ **AE-256 Encryption** – Data is secured both in transit and at rest.
- ✓ **Access Management**—Enforce role-based access control (RBAC), two-factor authentication (2FA), and detailed auditing logging.
- ✓ **Global Compliance**—IBM Cloud's international infrastructure meets data residency requirements and regulatory standards, such as the General Data Protection Regulation (GDPR) and HIPAA.

High-Performance File Access for Distributed Workforces

Empower your teams with fast and reliable access to the files they need, wherever they are:

- ✓ **Edge Caching** – Delivers near-local performance with smart file caching at the edge.
- ✓ **Unified Protocol Support** – Access files via Server Message Block (SMB), Network File System (NFS), or Simple Storage Service (S3) protocols.
- ✓ **Real-Time Sync** – Keep data updated across all endpoints with live synchronization.

Scalable & Flexible Cloud Integration

Future-proof your storage infrastructure with seamless integration and limitless scalability:

- ✓ **Multi-Cloud Deployment** – Operate in public, private, or hybrid cloud environments.
- ✓ **Flexible Growth** – Scale storage dynamically without requiring additional hardware.
- ✓ **Policy-Based Data Placement** – Optimize data routing across multiple providers based on performance and cost.

Seamless Collaboration & Automation

Support modern collaboration and simplify IT operations:

- ✓ **Global File Systems** – Enable secure, location-independent file access for your team.
- ✓ **Automated Management** – Seamlessly automate backups, archiving, and file synchronization for efficient operation.
- ✓ **Version History & Audit Trails** – Track access and changes for accountability and compliance.

Built-in Backup & Disaster Recovery

Ensure business continuity with integrated data protection.

- ✓ **Continuous Data Protection** – Use deduplication and compression to reduce storage overhead.
- ✓ **Immutable Storage** – Prevent unauthorized changes with Write Once, Read Many (WORM) compliance.
- ✓ **Rapid Recovery** – Restore data quickly with snapshots and automated backup systems.

Intelligent Data Management & Analytics

Gain control and insight over your data with smart management tools:

- ✓ **Centralized Dashboard** – Monitor and manage all your data from a single dashboard.
- ✓ **Real-Time Monitoring** – Detect issues and optimize usage with advanced reporting.
- ✓ **AI-Powered Insights** – Turn raw data into actionable intelligence for better decision-making.
